ABOUT ME

I am a B.Tech student in Artificial Intelligence and Machine Learning (2024–2028) with a strong focus on building scalable digital products. Beyond web and Python development, I am deeply interested in solving real-world problems through technology-driven business ideas.

I specialize in end-to-end web development using Python, Express.js, HTML, CSS, JavaScript, and TypeScript, and I have developed production-ready applications including business websites and financial calculator tools.

I actively explore startup models, AI-powered automation systems, and digital product monetization strategies. My goal is not just to code applications — but to build impactful, revenue-generating tech solutions.

Technical Skills

Full-stack developer with proficiency in Python, JavaScript, and TypeScript, building scalable web applications using React.js, Next.js, Node.js, and Express.js. Experienced in RESTful API development, database integration with Supabase, responsive UI design (HTML, CSS), and version control using Git..

PROJECTS

- Educlac-expert : Built a full-stack calculator platform with dynamic graph rendering and real-time computation engine. Implemented React-based UI components, Supabase backend integration, and Node.js server logic for scalable data processing.
- NoMoreDMs : A platform where users find a large collection of resources, image & video generation prompts. Stack I used React components , next.js,supabase.

CAREER OBJECTIVE

To combine Artificial Intelligence, web development, and strategic thinking to build impactful digital products that solve real-world problems. I seek opportunities where I can apply technical expertise in Python and full-stack development while contributing to scalable, revenue-generating technology solutions.

SOFT SKILLS

Strong analytical and critical thinking abilities with a structured approach to problem-solving and technical decision-making. Demonstrates leadership, initiative, and ownership in project execution from planning to deployment. Effective communicator capable of translating technical concepts into clear, actionable insights for diverse audiences. Highly adaptable to new technologies, frameworks, and AI tools with a continuous learning mindset. Skilled in time management, collaboration, and strategic thinking, with a focus on scalability, efficiency, and business-oriented solution development.
